Policyholder: AGC GLASS EUROPE S.A.

Notes to the hospitalisation plan

This version is valid as of 1/1/2025.

WHAT ADVANTAGES DOES THIS INSURANCE OFFER?

In the event of hospitalisation or serious illness, this insurance contributes to the medical costs that you still have to pay after the intervention of the health insurance fund. The costs related to your hospitalisation in a single room, incurred in the period of 1 month before and 3 months after the hospitalisation, are also eligible for intervention. In case of a hospitalisation in a shared room, the guaranteed period is extended to 2 months before and 6 months after the hospitalisation.

You decide in which hospital or clinic and by which recognised doctor you are treated.

WHO CAN BENEFIT FROM THIS INSURANCE?

This insurance applies to companies in the group AGC Glass Europe in Belgium ("AGEU Belgium"), which includes the following legal entities: AGC Glass Europe SA, AGC Automotive Europe SA, AGC Fabrication Belgium NV, AGC Mirodan NV, AGC Europe SA and AGC Glass Europe Sales.

As a member of staff or trainee "PFI" and **main insured party** younger than 65 years you automatically benefit from this insurance. Furthermore, members of your family can also become affiliated. The affiliation of family members is optional. They are referred to as additional insured parties.

Retired employees and their affiliated family members can also benefit from this insurance.

By **family members (additional insured parties),** we understand:

- the spouse;
- the cohabiting partner of the main insured party without family links;
- the legal, adopted or natural children, for whom the main insured party receives family allowance or a disability benefit;
- the unmarried children living at home, who are not chargeable;
- the children at charge of the spouse or the cohabiting partner without family links living with the main insured party or elsewhere because of study reason;
- the children of the main insured party living with the ex-spouse and for whom the main insured party pays maintenance allowance or in case of co-parenting.

If you decide to affiliate your family members, all your family members should become affiliated. This rule does not apply to family members who already have a similar insurance policy. They should, however, submit a certificate attesting to this.

You must inform your employer of all changes in the composition of your family. You are responsible for providing the correct data.

During a period of **full suspension of your employment contract** (including specific leave), you and your family members may continue to be covered by this insurance.

In the event of a suspension of maximum 1 year:

- for full-time suspension of the contract for time credit, leave without pay, career break or specific leave: the contributions for the employee and his family members are paid by the employee;
- for a full-time career break on medical grounds: the contribution for the employee is paid by the employer, the contributions for his family are paid by the employee.

For a suspension of more than 12 months:

- for full-time suspension of the contract for time credit, leave without pay, career break or specific leave: the contributions for the employee and his family members are paid by the employee and collected by direct debit;
- for a full-time career break on medical grounds: the contribution for the employee is paid by the employer, the contributions for his family are paid by the employee and collected by direct debit.

If you **retire** (statutory retirement), **join a statutory early retirement or an SWT-arrangement** (system of unemployment with employer's contribution), you can remain affiliated to this insurance policy. This applies both to you as the main insured party and to your family members (additional insured parties) who were affiliated to this insurance policy at the time of your retirement or at the time of your statutory early retirement or SWT.

If you retire or join a statutory early retirement, you should request this continuation of your affiliation in writing from your employer at the latest 1 month before your retirement or your statutory early retirement. If you join an SWT-arrangement, your affiliation will continue automatically.

If you join a statutory early retirement or an SWT-arrangement, you must, as the active workers, inform your employer of all changes in the composition of your family.

As soon as you retire, you should inform the administrator of all changes in the composition of your family.

In the event of the **death** of the main insured party, the family members who were already affiliated to this insurance policy can remain affiliated. The widow, widower or orphan can request this continuation in writing from the administrator within 2 months after the death on condition that the widow/widower doesn't get remarried.

HOW AND WHEN CAN YOU AND YOUR FAMILY MEMBERS BECOME AFFILIATED?

Main insured parties

As a member of staff and main insured party, you become affiliated automatically on the day you enter the service of your employer.

As a trainee "PFI" and main insured party, you become affiliated automatically after a traineeship of 3 months.

Additional insured parties (family members)

Your family members can become affiliated to this insurance as of the day of entitlement to affiliation and at the earliest on the day that you, as the main insured party, become affiliated.

The day of entitlement to affiliation is:

- for the spouse: the day of the wedding;
- for the cohabiting partner: the day of the start of the cohabitation;
- for a child: the day of birth or the day of adoption.

If the request for affiliation is made within 30 days of the day of entitlement to affiliation, then the family member becomes affiliated on time and we refer to **affiliation on time**. If the request is made later, then the family member becomes affiliated belatedly and this is considered a **belated affiliation**.

ARE THERE ANY MEDICAL FORMALITIES? WAITING PERIODS? ARE PRE-EXISTING DISORDERS INSURED?

Main insured parties

As the main insured party, you become affiliated without medical formalities and without waiting periods.

Any pre-existing disorders are insured.

Additional insured parties (family members) – Affiliation on time

If your family members become affiliated on time, there are no medical formalities and no waiting periods.

For family members who become affiliated on time, any pre-existing disorders are insured.

Additional insured parties (family members) - Belated affiliation

If your family members become affiliated belatedly, medical formalities do have to be fulfilled. This means that they have to complete a medical questionnaire. In this case, the applicant insured parties are also responsible for the costs of any additional examinations. The insurer can accept the affiliation, exclude certain disorders, refuse the affiliation or request an additional premium.

If any medical exclusions are stipulated, the applicant insured party receives a letter about this. The affiliation is definitive when you sign this letter and return it to the insurer.

If the insurer refuses the affiliation, the applicant insured party also receives written notification of this.

In the event of a belated affiliation, a general waiting period of 3 months applies. A waiting period is a period of time that begins as of the date of affiliation of the insured party. The insurer does not reimburse the costs incurred during this period. Only accidents and a limited number of acute infectious diseases are exempt from a waiting period.
In the event of a belated affiliation, the insurer never reimburses the costs for any pre-existing disorder(s).

WHEN DOES THIS INSURANCE END?

Main insured party

For the main insured party, the affiliation ends:
- the first of the month following the termination of the contract when the employment or internship contract with the employer ends or is terminated (in the event of retirement or statutory early retirement, the affiliation can be continued with this contract. In the event of SWT you and your family members remain automatically affiliated to this contract);
- upon death;
- upon the end of the occupational health insurance agreement.

Additional insured parties (family members)

For family members the affiliation ends:
- in case they terminate the affiliation voluntarily. From that time, it is no longer possible to re-subscribe, unless the termination was the result of an affiliation to a similar insurance;
- when the employment or internship contract between the main insured party and the employer ends or is terminated;
- if they lose the status of additional insured party. The coverage stops as of the day on which they no longer fulfil the definition of additional insured party (e.g. the day of divorce);
- in the event of death.

The guarantees for the **outpatient costs** (see “Related ’pre- and post-hospitalisation’ cover” and “Costs for outpatient care in the event of ‘serious illnesses’”) end on the day the affiliation is terminated. In case of an ongoing hospitalisation the moment the affiliation is terminated, the main ‘**Hospitalisation’** cover ends when the hospitalisation ends and at the latest 180 days after the day the affiliation has ended.

WHAT IS INDIVIDUAL CONTINUATION?

If you lose the right to affiliation to this occupational health insurance agreement (e.g. in case of change of employer, resignation, divorce, the conditions of affiliation for your child are no longer fulfilled), you are given the possibility, together with the family members who are affiliated to this insurance policy, to continue the insurance on an individual basis. This continuation can be effected without medical formalities or waiting periods if a number of conditions are fulfilled.

The affiliation of the employees that are no longer in service because of retirement, statutory early retirement or SWT and their family members who are affiliated at that moment, can remain affiliated to this insurance.

1. Entry conditions

To continue the insurance on an individual basis without waiting periods and without medical formalities, the main insured party must have been continuously affiliated to one or more successive ‘hospitalisation – medical costs’ insurance contracts concluded with an insurance company for at least two years prior to the date of the loss of your affiliation. You can only continue on an individual basis provided that you were affiliated for at least two years prior to the date of the loss of affiliation.

Moreover, any pre-existing disorders which were already insured at the time of affiliation to the occupational health insurance agreement remain insured in the individual contract.

2. Periods

Main insured party

Within thirty days of the loss of the benefit of this insurance, your employer will inform you in writing or electronically of the possibility of individual continuation.

You have a period of thirty days to inform the administrator of your intention to continue the insurance fully or partially on an individual basis. This period is extended by thirty days provided that you inform the administrator of this in writing or electronically.

These periods begin to run as of the day when the employer informs you in writing or electronically of the loss of the benefit of the occupational health insurance agreement and the possibility of individual continuation. This period expires in any case one hundred and five days after the day of the loss of the benefit of the occupational health insurance agreement.

Additional insured parties (family members)

For the additional insured party, the same periods apply as those set out above for the main insured party. A different period only applies if the additional insured party loses the benefit of the occupational health insurance agreement for a reason other than the loss of the benefit of the occupational health insurance agreement by the main insured party. In that case, the additional insured party has a period of one hundred and five days to inform the administrator in writing or electronically of their intention to exercise the right of individual continuation. This period begins to run as of the day when the additional insured party loses the benefit of the occupational health insurance agreement (e.g. the day of divorce).

3. Rate conditions

The conditions of the individual contract are those of the individual contracts in force at the insurance company at the time of the individual continuation. The cover offered is at least similar to the cover provided by the occupational health insurance agreement.

The rate conditions are equal to those in force at the time of the loss of the benefit of the occupational health insurance agreement.

The individual contract begins at the time of the loss of the benefit of the occupational health insurance agreement. The individual contract cannot in principle be terminated by the insurer.

WHAT IS PRE-FINANCING?

The premiums of individual insurance policies are usually slightly more expensive than the premiums of an occupational health insurance agreement. The law on health insurance therefore makes provision for a pre-financing system.

You can pay an additional premium on an individual basis whereby the premium in the event of individual continuation is equal to the premium of the age at which you began the pre-financing. This is done through a separate contract, known as a pre-financing policy.

More information is available on the website: www.wachtpolis.be.

WHICH COSTS ARE REIMBURSED?
HOW MUCH IS THE INTERVENTION?

Main 'hospitalisation' cover

The insurer reimburses the medical costs that you have incurred during the hospitalisation caused by an illness, an accident, a pregnancy or a childbirth. These costs must be directly related to the cause of the corresponding hospitalisation.

By hospitalisation we understand the medically necessary stay in a recognised hospital or clinic for which fees are charged for the stay. Admission to a day clinic is insured insofar as a legal flat rate is charged (maxi-flat rate, mini-flat rate, flat rate day clinic 1 to 7, flat rate chronic pain 1 to 3 or the use of the plaster room).

The insurance contributes to the following costs:

- the costs for **stay**, **fees** of the **doctor or paramedic**, **examinations, treatments, registered medication in Belgium and para-pharmaceutical products**. The costs and treatments must be included in the nomenclature of medical services of the mandatory health and disability insurance;

- the costs incurred by the use of **medical techniques and equipment** without intervention by the health insurance fund, on condition the costs are medically justified;

- the costs of **palliative care** and the costs of the **mortuary**. The insurer reimburses these costs without restriction provided they are charged on the hospitalisation invoice;

- the costs for **transport** by ambulance to the hospital, included by helicopter, provided that the transport is urgent. These costs are reimbursed without restriction;

- the costs charged for **rooming-in**. By rooming-in we understand the stay of one of the parents with an insured, hospitalised child aged up to 14 years. The presence of one of the parents is considered as medically necessary by the doctor in attendance;

- the costs of a stay in hospital by an **organ or tissue donor,** provided that the transplant is medically justified. The insurer reimburses these costs without restriction;

- the costs of **medically assisted reproduction (artificial reproductive techniques)** are insured in case of hospitalisation or one day clinic, and provided that the mandatory insurance for medical care and allowances applies. Freezing sperm or egg cells (oncofreezing) is not insured;

- the costs of **home birth.** The reimbursement amounts, pre- and posthospitalisation included, to a maximum of 619,73 EUR per home birth;

- the costs of **prostheses, orthodontics** and **spectacles** prescribed by an ophthalmologist. The mandatory insurance for medical care and allowances must intervene for these costs. The maximum insurance payment for each service provided is 3 times the amount of this legal intervention;

- the costs of **orthopaedic appliances**. The mandatory insurance for medical care and allowances must intervene for these costs. The maximum insurance payment for each service provided is 1 time the amount of this legal intervention;

- the costs for the **rental of orthopaedic appliances**;

- the costs of **sudden infant death test**.

In case of hospitalisation due to **nervous or mental illness,** with the exception of multiple sclerosis and Parkinson's disease. There is a reimbursement during a maximum of two years hospitalisation, successive or otherwise, starting from the beginning of the first hospitalisation.
Where an insured party is hospitalised, the costs for which no legal intervention is provided are reimbursed at 100% on condition that the medical costs are justified. This does not apply to dental prostheses and orthopaedic devices.

Related 'pre- and post-hospitalisation' cover

This additional cover provides for the reimbursement of the **costs of medically necessary outpatient care** provided during **a determined period before and after** the covered hospitalisation or prescribed by a doctor. These medical costs must be directly related to the cause of the corresponding hospitalisation and included in the nomenclature of medical services of the mandatory health and disability insurance.

In case of a **hospitalisation in a single room**, this period is **1 month before and 3 months after** the covered hospitalisation.

In case of a **hospitalisation in a shared room**, this period is **2 months before and 6 months after** the covered hospitalisation.

This insurance intervenes for the following medical costs:

- the **fees** of the doctor or paramedic;
- **examinations** and **treatments**;
- **registered medication in Belgium** prescribed by a doctor and purchased at a pharmacy;
- **astronaut food and para-pharmaceutical products** are reimbursed at 100% on condition that the costs are medically justified;
- the costs of **prostheses, orthodontics** and **spectacles** prescribed by an ophthalmologist, insofar as the mandatory insurance for medical care and allowances intervenes. The maximum insurance payment for each service provided is 3 times the amount of this legal intervention;
- the costs of **orthopaedic appliances**, insofar as the mandatory insurance for medical care and allowances intervenes. The maximum insurance payment for each service provided is 1 time the amount of this legal intervention;
- the costs for **rental of orthopaedic appliances**. The reimbursement amounts to a maximum of 123,95 EUR per insured party and per insurance year. These costs are only reimbursed during the 3 months after the hospitalisation;
- the costs of accommodation in a **convalescent home**. The maximum amount that the insurer shall reimburse is the amount per day that is payable by the insured party and that is determined in accordance with the royal decree. These costs are only reimbursed during the 3 months following admission;
- the costs of **homeopathy, chiropractic, osteopathy and acupuncture**. The reimbursement amounts to 100% of the medical justified costs.

All costs must of course be incurred further to insured hospitalisation.

The insurer does not reimburse the costs for **transport** during this pre- and post-hospitalisation period.

The pre- and post-hospitalisation costs related to an insured hospitalisation and for which no legal intervention is provided are reimbursed at 100% on condition that the costs are medically justified. This does not apply to dental prostheses and orthopaedic devices.

The **maximum reimbursable amount** for the hospitalisation and pre- and post-hospitalisation cover is without restriction

Costs for outpatient care in the event of 'serious illnesses'

In the event of one of the following disorders:

AIDS, amyotrophic lateral sclerosis, cholera, diabetes, diphtheria, encephalitis, meningitis, cancer, polio, leukaemia, anthrax, mucoviscidosis, multiple sclerosis, kidney complaint requiring dialysis, typhoid- or paratyphoid fever, variola, progressive muscular dystrophy, scarlet fever, tetanus, tuberculosis, viral hepatitis, typhus, Alzheimer's disease, Creutzfeldt-Jakob's disease, Crohn's disease, Hodgkin's disease, Parkinson's disease or Pompe's disease, the insurer reimburses the costs of the outpatient care actually incurred for the treatment. This means all medical costs for services that are prescribed or provided by a doctor and which are included in the nomenclature of medical services of the mandatory health and disability insurance.

This insurance intervenes for the following medical costs:

- the **fees** of the doctor or paramedic;
- **examinations** and **treatments**;
- **registered medication in Belgium** prescribed by a doctor and purchased at a pharmacy;
- **astronaut food and para-pharmaceutical products** are reimbursed at 100% on condition that the costs are medically justified;
- the costs of **prostheses, orthodontics** and **spectacles** prescribed by an ophthalmologist, insofar as the mandatory insurance for medical care and allowances intervenes. The maximum insurance payment for each service provided is 3 times the amount of this legal intervention;
- the costs of **orthopaedic appliances**, insofar as the mandatory insurance for medical care and allowances intervenes. The maximum insurance payment for each service provided is 1 time the amount of this legal intervention;
- the costs for the **rental of orthopaedic appliances**. The reimbursement amounts to a maximum of 123,95 EUR per insured party and per insurance year;
- the costs for **transport by ambulance**. These costs are reimbursed without restriction;
- the costs of **homeopathy, chiropractic, osteopathy and acupuncture**. The reimbursement amounts to 100% of the medically justified costs.

These costs must of course be incurred further to an insured serious illness.

The costs as a result of an insured serious illness for which no legal intervention is provided are reimbursed at 100% on condition that the costs are medically justified. This does not apply to dental prostheses and orthopaedic devices.

The **maximum reimbursable amount** for the cover for outpatient care in the event of "serious illnesses" is without restriction.

Important: If you are admitted to hospital further to an insured serious illness, then the reimbursement conditions of the 'hospitalisation' cover apply for the costs incurred during this period of hospitalisation.

WHICH COSTS ARE NOT REIMBURSED?

The plan does not make any payment for costs incurred by or as a consequence of:

- being in a state of inebriation, alcoholism, alcohol inebriation or the use of drugs;
- voluntary participation to a crime or an offence;
- ionising radiation, with the exception of medically necessary radiation;
- a war, acts of the same nature (e.g. riots) or civil war. The guarantee likewise applies where the insured party proves that the accident or illness is neither directly nor indirectly related to these events.

Are also excluded from this cover:

- illnesses, accidents and childbirth during the waiting period;
- illnesses, accidents, pregnancy and childbirth during the period of suspension of the cover;
- care from the date of suspension of the guarantees, even if the care commenced before the suspension date;
- cosmetic care or cosmetic treatments, unless they are consequence of a covered illness or a covered accident;
- sterilization and treatment to birth control;
- the upkeep, support and supervision of the insured;
- cures;
- outpatient care of a new-born directly in connection with the childbirth during a period of 3 months after the childbirth and under the terms of the additional cover “Pre- and post-hospitalisation”.

HOW THE INTERVENTION IS CALCULATED?

This insurance always intervenes after the intervention of the legislation on social security, occupational illnesses, industrial accidents and accidents on the way to and from work, as well as contracts already taken out for the same purpose.

If you do not receive or are not entitled to the legal intervention for any reason, then a theoretical intervention is taken into account for the calculation of the insurance payments guaranteed. This theoretical intervention is equal to the legal intervention as stipulated by Belgian social legislation applicable for employees in the event of illness or accident. This means that the legal intervention is deducted, even if you are not entitled to the legal intervention for any reason.

You are not taxed on the insurance payments that you receive and therefore do not have to pay social charges on the benefit received.

IS THERE AN EXCESS OR DEDUCTIBLE?

There is **no excess or deductible** in case of a **(day)hospitalisation in a shared room**.

If the insured party chooses for a **(day)hospitalisation in a single room**, there is an excess or deductible. **The excess or deductible** amounts to **200,00 EUR** per insured and per insurance year. An insurance year is the period that begins on the general renewal date of the insurance policy and ends twelve months later.

The excess is only applied once for an uninterrupted hospitalisation spanning two insurance years.
There is no excess or deductible for outpatient costs relating to the cover for “serious illnesses”.

Important: If you are admitted further to an insured serious illness, then the aforementioned excess or deductible is deducted for the costs incurred during this hospitalisation.

WHAT IS THE MEDI-LINK THIRD-PARTY PAYER SYSTEM?

In the event of an insured hospitalisation, the **Medi-Link** third-party payer system pays your hospitalisation invoice directly to the hospital. You do not have to pay an advance to the hospital and afterwards you only pay the excess and the costs that are not covered by this insurance.

For any further information on Medi-Link please visit our website https://www.vanbreda-health.be/en/medi-link/. With our **Vanbreda app** you always have all your cards digitally at hand (Medi-Link, AssurPharma, Assi-Link – if applicable in your contract).

WHAT ABOUT COSTS INCURRED ABROAD?

This insurance is valid throughout the world.

The reimbursement of the costs of each treatment carried out abroad as a consequence of a **risk that arose in Belgium**, is subject to the prior approval of the administrator.
If the insured party moves his domicile abroad, the administrator shall only be required to reimburse the costs if he is informed in advance and has given his agreement for the continuation of the agreement.

For **costs incurred abroad** this insurance provides for the reimbursement per treatment in accordance with the relevant conditions (see "Which costs are reimbursed? What is the amount of the reimbursement?").
Where the insured party moves his domicile abroad, this insurance provides for the reimbursement per treatment in accordance with the relevant conditions, but at the rate of 50% of the costs (see "What costs are reimbursed? What is the amount of the reimbursement?").

"Border workers", employees who live in a country bordering Belgium, enjoy the same guarantee as employees who live in Belgium.

WHAT IS ASSI-LINK?

This assistance insurance supplements your existing hospitalisation insurance. The additional insurance covers assistance in case of medical problems abroad, as well as hospitalisation in the country in which you are domiciled (Belgium, the Netherlands, France, Germany and the Grand Duchy of Luxembourg).

Assistance abroad:

- first aid;
- assistance to family members;
- extension of the stay abroad;
- transportation;
- coverage in case of death abroad.

Assistance in the country in which you are domiciled (Belgium, the Netherlands, France, Germany or the Grand Duchy of Luxembourg):

- coverage "During hospitalisation", for example, domestic help, child care and transportation;
- coverage "After hospitalisation", for example, domestic help, babysitting, postnatal care by a midwife, supply of medication and transport;
- coverage for "Additional Assistance", for example, psychological assistance, contact details of homecare institutions and pharmacy and doctor on call.

Specific repayment terms apply to each coverage mentioned above. For more information concerning these covers, you can contact the administration at the contact data mentioned in the chapter “What is the claim settlement procedure?”.

If you wish to avail of Assi-Link, please call **+32 2 773 62 26**.

HOW MUCH ARE THE PREMIUMS?

For the active main insured parties, the main insured parties in SWT and for the main insured parties in statutory early retirement until they reach the age of legal retirement, the premiums are paid by the employer.

For those cases and for **the main insured parties during a full-time contract suspension for less than 12 months**, time credit, leave without pay, a career break or care leave who pay the premium themselves, the monthly contribution for the **hospitalisation insurance and Assi-Link**, including charges and taxes, is equal to:

- 17,69 EUR for an adult younger than 65 years
- 49,04 EUR for an adult from 65 years

For the partner of the active main insured parties and of the main insured parties in SWT

Except in specific cases, the contributions are withheld from the salary of the main insured party. These contributions are payable monthly in arrears.
Under specific conditions proper to AGC, these contributions can be withheld from the November premium or participation premium.

The **monthly** contribution for the **hospitalisation insurance and Assi-Link**, including charges and taxes, is equal to:

- 17,69 EUR for an adult younger than 65 years
- 49,04 EUR for an adult from 65 years

For the children of the active main insured parties and of the main insured parties in SWT

The contributions are deducted from the salary of the main insured party. They are payable monthly in arrears.

The **monthly** premium for the **hospitalisation insurance and Assi-Link**, including charges and taxes, is equal to:

- 7,06 EUR for a child younger than 21 years
- 23,93 EUR for a child from 21 years

Under an agreement, specific to AGC, the monthly personal contribution is limited to:

- 7,06 EUR for a child younger than 21 years
- 7,06 EUR for a child from 21 years that is still eligible for family allowance
- 23,93 EUR for a child from 21 years that is no longer eligible for family allowance

The insured party must immediately notify to AGC the loss of family allowance for a child from 21 years.

Under an agreement, specific to AGC, in a family with at least 4 children under the age of 16, the affiliation is free starting from the 4th child under 16.

For retired employees (only statutory retirement) and their family members, for the main insured party during a full-time contract suspension for more than 12 months during time credit, leave without pay, a career break or care leave and their family members, for family members of a main insured party with a long-term illness (more than 12 months) and for family members of a main insured party in statutory early retirement:

The premiums are borne by the insured and collected by the administrator via direct debit.

The **quarterly** premium for the **hospitalisation insurance and Assi-Link**, including charges and taxes, is equal to:

- 22,54 EUR for a child younger than 21 years
- 76,59 EUR for an adult younger than 65 years
- 216,08 EUR for an adult from 65 years

Comment: If the type of premium changes during the year, the premium amount will not change until 1 January of the following year. For example: if my child turns 25 in July 2018, and is no longer entitled to receive family allowance, the premium amount will not change until 1 January 2019.

HOW TO EASILY DECLARE A NEW HOSPITALISATION OR SUBMIT COSTS?

- by the Vanbreda app https://www.vanbreda-health.be/en/vanbreda-app
- on the website www.vanbreda-health.be/en/

Would you also like to enjoy our simple, fast working and 100% secure digital services? Visit our website www.vanbreda-health.be/en/im-going-digital/ and discover what's right for you!

If you have any further questions, we are happy to assist you online https://www.vanbreda-health.be/en/contact-us or by telephone 03 217 54 48.

We invite you to consult the claims procedure for useful advice on the declaration of a hospitalisation or to open a serious illness file and the introduction of medical expenses (see links in "Sharepoint").

Vanbreda Risk & Benefits uses your personal data to meet all legal obligations and to fulfil her role as administrator of your medical plan. More information about the processing of your personal data can be found in our privacy policy on our website https://www.vanbreda.be/en/privacy/.
